Lime	2600	2790
Slate	2790	2815
Lime and slate	2815	2982
Sand (gas, 2984'0; salt water, 2985') (not drilled through yet)		2982

"The gas which was struck at about 2984 feet was struck after going through a very HARD rock, in which the tools got struck. Took two hours to get the tools out, and then had a flow of gas estimated by the drillers at two million feet, and which is still coming up through the water, and which turns when they put a light over the bubbles.....The well is still full of water....."
