PERMIT
PROPOSED MANNER OF PLUGGING AND FILLING WELL

WEST VIRGINIA DEPARTMENT OF MINES
OIL AND GAS DIVISION

WORK ORDER

Well to be plugged and filled as follows:

Well record: Drilled in 1904. Total depth 2739'. 6 5/8" casing at 2150'.
- P6h Coal 640' - 648'
- Gordon Sand 272' - 273'.
- Pith Sand 2932' - 2932'6" = DRY
- Total Depth 2950'.

We propose to plug and abandon as follows:

Fill with impervious earth material from bottom to 2675'.
Use solid pine plug at 2675'.
Fill with impervious earth material to 2575'.
Use solid pine plug at 2575'.
Place cement plug on top of wood plug at 2575'.
Cement plug to be 10' long.
Fill with impervious earth material to 2200'.
Use 5' of pine expansion plug at 2200' to 2195'.
Place cement plug on top of wood plug at 2195'.
Cement plug to be 10' long.
Fill with impervious earth material to 2150'.
Shoot off 6 5/8" casing at 800', and pull same above 800'.
Fill with impervious earth material from 2150' to 675'.
Place cement plug from 675' to 610'.
Fill with impervious earth material from 610' to surface.
Erect monument at surface location.

Note: Since there are no coal mines within a radius of approximately 10 miles, the coal is at a depth of (640' - 648') at this location, as recorded on well record, we would like to plug with cement through the coal zone as a vent pipe would probably be rotted off long before any mining is started, if ever.

ALL CEMENT BE MIXED WITH WATER MULY.

To the Department of Mines,
Coal Owner or Operator,
Lease or Property Owner.

Gentlemen:

This "work order" is submitted for your approval and concurrence and unless notified of your disapproval or non-concurrence, the undersigned will proceed with the plugging and filling of said well in the above described manner on the date stated in the notice of intention to plug and abandon the said well on opposite side of this sheet.

Very truly yours,

PITTSBURG OIL & GAS COMPANY

General Superintendent. Well Operator.

No objections have been filed by the coal owner or coal operator, or any available adjacent lease or property owners or interposed by the Department of Mines to the manner herein described for the plugging and filling of the well above mentioned. Therefore, the same is hereby approved this 19th day of October, 1924.

DEPARTMENT OF MINES
Oil and Gas Division

By: ____________________________________________

NOTE: This "work order" must be filed in duplicate, one copy for the files of the Department of Mines and the other to be approved or corrected and returned to the well operator as his authority for plugging said well.

COPY TO INSPECTOR COURTNEY.
AFFIDAVIT IN TRIPLECT TO TIME AND MANNER OF PLUGGING AND FILLING WELL

WEST VIRGINIA DEPARTMENT OF MINES
OIL AND GAS DIVISION

WELL AND LOCATION

Greenbrier District
Doddridge County
Well No. 2

Cornelius Maxon Farm

AFFIDAVIT TO BE MADE IN TRIPLECT. ONE COPY TO BE MAILED BY REGISTERED MAIL TO THE DEPARTMENT. ONE COPY TO BE RETAINED BY THE WELL OPERATOR AND THE THIRD COPY (AND EXTRA COPIES IF REQUIRED) TO BE MAILED TO EACH COAL OPERATOR ABOVE NAMED AT THEIR RESPECTIVE ADDRESSES.

AFFIDAVIT

STATE OF WEST VIRGINIA,
COUNTY OF: (Signature)

being first duly sworn according to law deposite and say that they are experienced in the work of plugging and filling oil and gas wells and were employed by Pittsburg Oil & Gas Co., well operator, and participated in the work of plugging and filling the above well, that said work was commenced on the 13th day of August, 1937, and that the well was plugged and filled in the following manner:

Manner in which sand was plugged: Filled with impervious earth material from the bottom to 2675 ft. Put in solid pine plug at 2675 ft. Filled with impervious earth material to 2575 ft. Put in solid pine plug at 2575 ft. Placed cement plug on top of wood plug at 2575 ft. Cement plug 10 ft. long. Filled with impervious earth material to 2200 ft. Put in 5 ft. of pine expansion plug at 2200 ft. to 2195 ft. Placed cement plug on top of wood plug at 2195 ft. Cement plug 10 ft. long. Filled with impervious earth material to 2150 ft. Shot off 6 3/8" casing at 800 ft and pulled above 800 ft. Filled with impervious earth material from 2150 ft. to 675 ft. Placed cement plug from 675 ft. to 610 ft. Filled with impervious earth material.

Manner in which coal was plugged: Filled from 610 ft. to surface.

Note: No coal mines within a radius of approximately 10 miles of this well. Coal vein at a depth of 640 ft. to 648 ft. Plugged through coal with cement. Ran cement beginning 35 ft. below the coal to 30 ft. above the coal.

NOTE: All cement mixed with water only.

Description of monument:

Concrete monument 3 ft. square at base and 1 ft. square at top - 36 inches above surface - with name of farm and well number.

(THE ABOVE DESCRIPTIONS MUST BE IN DETAIL AND IN ACCORDANCE WITH THE PROVISIONS OF SECTION 2, ARTICLE 4, CHAPTER 92 OF THE CODE)

and that the work of plugging and filling said well was completed on the 5th day of November, 1937.

And further deponent saith not.

Notary Public.
