Show of oil and gas in Berea Sand, but no oil or gas was found in commercial quantities.

Tidd Well

WELL RECORD NO. 4 - TIDD WELL. 70045

No detailed record of this well could be obtained, except that it was drilled about 1905-06, and that gas was encountered in the Berea Sand at 1898'.

The writer examined this well in 1911 and gas was seeping from the well. We understand that the gas is still seeping from the well at this time.
