WELL WORK PLUGGING PERMIT

Plugging

This permit, API Well Number: 47-3901765, issued to CHESAPEAKE APPALACHIA, L.L.C., is evidence of permission granted to perform the specified well work at the location described on the attached pages and located on the attached plat, subject to the provisions of Chapter 22 of the West Virginia Code of 1931, as amended, and all rules and regulations promulgated thereunder, and to all conditions and provisions outlined in the pages attached hereto. Notification shall be given by the operator to the Oil and Gas Inspector at least 24 hours prior to the construction of roads, locations, and/or pits for any permitted work. In addition, the well operator shall notify the same inspector 24 hours before any actual well work is commenced and prior to running and cementing casing. Spills or emergency discharges must be promptly reported by the operator to 1-800-642-3074 and to the Oil and Gas inspector.

Upon completion of the plugging well work, the above named operator will reclaim the site according to the provisions of WV Code 22-6-30. The above named operator will also file, as required in WV Code 22-6-23, an affidavit on form WR-38 by two experienced persons in the operator's employment and the Oil and Gas inspector that the work authorized under this permit was performed and a description given. Failure to abide by all statutory and regulatory provisions governing all duties and operations here under may result in suspensions or revocation of this permit and in addition may result in civil and/or criminal penalties being imposed upon the operator.

This permit will expire in two (2) years from date of issue. If there are any questions, please free to contact me at (304) 926-0499 ext. 1654.

James Martin
Chief

Operator's Well No: 9083
Farm Name: DICKINSON, SALLIE J.
API Well Number: 47-3901765
Permit Type: Plugging
Date Issued: 05/27/2016

Promoting a healthy environment.

05/27/2016

PERMIT CONDITIONS

West Virginia Code §22-6-11 allows the Office of Oil and Gas to place specific conditions upon this permit. Permit conditions have the same effect as law. Failure to adhere to the specified permit conditions may result in enforcement action.

CONDITIONS

1. All pits must be lined with a minimum of 20 mil thickness synthetic liner.
2. In the event of an accident or explosion causing loss of life or serious personal injury in or about the well or while working on the well, the well operator or its contractor shall give notice, stating the particulars of the accident or explosion, to the oil and gas inspector and the Chief within twenty-four (24) hours.
3. Well work activities shall not constitute a hazard to the safety of persons.
4. This well is under a consent order and must be plugged under the terms of that agreement.

PLUGGING PROCEDURE

- 1) Prepare road and location, MIRU service rig
- 2) Run in hole with tools to check TD at approximately 2020'
- 3) Attempt to pull 3" and packer
 - A) If successful
 - a) Run W.S. to TD (approximately 2020'), spot gel
 - b) Spot 150' cement plug 2020'-1870', pull W.S.
 - c) Proceed to step 4
 - B) If unsuccessful
 - a) Run W.S. as deep as possible (approximately 2020') spot gel
 - b) Spot 45' cement plug 2020'-1985', pull W.S.
 - c) Cut 3" at free-point (approximately 1955') and pull
 - d) Rip or shoot holes in 7" at approximately 1925'
 - e) Run W.S. to 1955', spot gel
 - f) Spot 100' cement plug 1955'-1855', pull W.S.
 - g) Proceed to step 4

 Environmental Protection

- 4) Shoot or rip holes in 7" at approximately 1550' and 1520'
- 5) Run W.S. to 1550', spot gel
- 6) Spot 100' cement plug 1550'-1450', pull W.S. *- Elevation*
- 7) Cut 7" at free-point (approximately 1300') and pull
- 8) Run W.S. to 1300', spot gel
- 9) Spot 100' cement plug ¹³⁵⁰~~1300~~'-1200', pull W.S. to 1050'
- 10) Spot 100' cement plug 1050'-950', pull W.S. to 800'
- 11) Spot 200' cement plug 800'-600', pull W.S.
- 12) Find free-point in 8 5/8" casing and pull from where free.

Spot AS on plug

*If at least 490' of 8 5/8" cannot be pulled, then rip holes so the following plugs can be set.

- 13) Run W.S. to 490' and spot gel
- 14) Spot 100' cement plug 490'-390', pull W.s. to 320' *CORAL*
- 15) Spot 120' cement plug 320'-200', pull W.S. to 100' *CORAL*

*NOTE: There is an open mine at 281'-287' so a brush bridge may need to be set above the mine in order to cement above the mine.

- 16) Spot 100' cement plug 100'-surface
- 17) Pull W.S. and top off with cement
- 20) Set monument and reclaim as prescribed by law.

TO THE PERSONS NAMED ABOVE: You should have received this Form and the following documents:

- (1) The application to Plug and Abandon a Well on Form WW-4B, which sets out the parties involved in the work and describes the well its and the plugging work order; and
- (2) The plat (surveyor's map) showing the well location on Form WW-6.

The reason you received these documents is that you have rights regarding the application which are summarized in the instructions on the reverses side. However, you are not required to take any action at all.

Take notice that under Chapter 22-6 of the West Virginia Code, the undersigned well operator proposes to file or has filed the Notice and Application and accompanying documents for a permit to plug and abandon a well with the Chief of the Office of Oil and Gas, West Virginia Department of Environmental Protection, with respect to the well at the location described on the attached Application and depicted on the attached Form WW-6. Copies of the Notice, the Application, and the plat have been mailed by registered or certified mail or delivered by hand to the person(s) named above (or by publication in certain circumstances) on or before the day of mailing or delivery to the Chief.

GENERAL NOTES

This drawing is a schematic representation of the well site and access road. Proposed structures such as well site, drilling pit, roadways, culverts, sediment barriers, etc. are show in approximate pre-planning configurations.

All culvert pipes will be a minimum of 15 inches in diameter. all culvert pipes installed will be accompanied by an entrance sump with dimensions no less than 3 feet (width) x 3 feet (length) x 4 feet (deep). Culverts will be installed at an angle to ensure proper flow. The out fall of culverts will be protected from erosion and sedimentation using large rocks or other sediment controls deemed necessary in the prevention of erosion and sedimentation. Storm water from the ditches to the culverts will be directed to stable natural vegetative areas. Where culverts are not practical, operator will have other sediment control in place to minimize erosion sedimentation.

Cross drains, broad based dips, water bars, and diversion ditches, will be employed during the construction phase. These erosion and sediment control structures will be used to control erosion and sedimentation during the construction phase, where applicable, and in areas that will allow. These structures will be considered permanent and used as such.

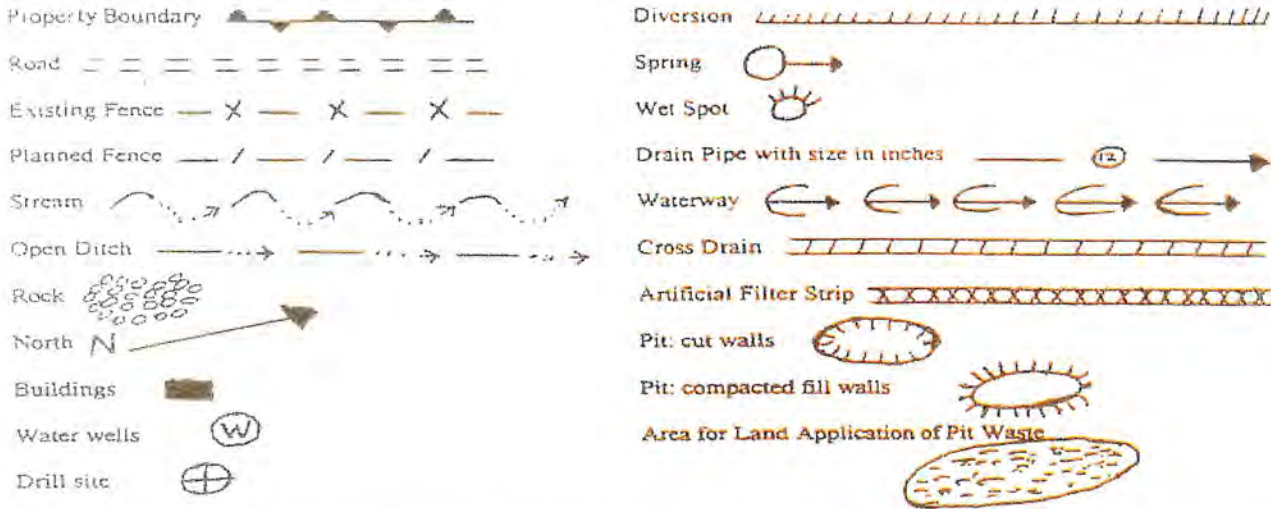

Permanent seeding: See Attachment #1.
