Unrecorded	2	1187
Total depth		1187

"The well starts about 115 feet below the horizon of the Washington coal, or 370 feet above the Pittsburgh coal bed. The drillers have called the 35 feet of sand at 235 feet the 'Black Creek'. This sand is the great cliff rock along Black Creek and Hollow and Green Creeks; hence it is well named from the former stream, and was so named by the writer in the descriptions of the formations of the Monongahela series. The wells in this field all require shooting to get the best results."
