"You will notice by the enclosed 'Work Order' that we are starting to plug this well from a depth of 2343 feet, while the original log shows the well has been drilled to a total depth of 3074 feet. This well was plugged from 3074 feet to 2343 feet, where it continued to produce gas in paying quantities, but as this plugging was done several years ago we do not have any record of the manner in which it took place."

Present total depth 2343
