To Whom it may concern,

The well work in question was performed in a 4 day period with the inspector Ralph Triplett present. I believed with him signing off on this afterwards was all that needed to be done.

What work was done; poured 100 barrels of water in the well, ran the drill for about ½ day to clean out, logged well, ran a string of 2 7/8 pipe with no packer, swabbed the fluid off and the contractor Allen Petty hauled it off and put the well back into production. Planted 100lbs of orchard grass as requested by land owner. All work was approved by Mr. Triplett.

If there are any more questions please contact me at Clyde Smith 304-638-8956 cjminerals@frontier.com
