WELL WORK PLUGGING PERMIT

Plugging

This permit, API Well Number: 47-10301540, issued to AMERICAN ENERGY-MARCELLUS, LLC, is evidence of permission granted to perform the specified well work at the location described on the attached pages and located on the attached plat, subject to the provisions of Chapter 22 of the West Virginia Code of 1931, as amended, and all rules and regulations promulgated thereunder, and to all conditions and provisions outlined in the pages attached hereto. Notification shall be given by the operator to the Oil and Gas Inspector at least 24 hours prior to the construction of roads, locations, and/or pits for any permitted work. In addition, the well operator shall notify the same inspector 24 hours before any actual well work is commenced and prior to running and cementing casing. Spills or emergency discharges must be promptly reported by the operator to 1-800-642-3074 and to the Oil and Gas inspector.

Upon completion of the plugging well work, the above named operator will reclaim the site according to the provisions of WV Code 22-6-30. The above named operator will also file, as required in WV Code 22-6-23, an affidavit on form WR-38 by two experienced persons in the operator's employment and the Oil and Gas inspector that the work authorized under this permit was performed and a description given. Failure to abide by all statutory and regulatory provisions governing all duties and operations here under may result in suspensions or revocation of this permit and in addition may result in civil and/or criminal penalties being imposed upon the operator.

This permit will expire in two (2) years from date of issue. If there are any questions, please free to contact me at (304) 926-0499 ext. 1654.

James Martin
Chief

Operator's Well No: F. L. HOGE H-14
Farm Name: WVA. PUBLIC LAND CORP.
API Well Number: 47-10301540

Date Issued: 06/30/2015

PERMIT CONDITIONS

West Virginia Code §22-6-11 allows the Office of Oil and Gas to place specific conditions upon this permit. Permit conditions have the same effect as law. Failure to adhere to the specified permit conditions may result in enforcement action.

CONDITIONS

1. All pits must be lined with a minimum of 20 mil thickness synthetic liner.
2. In the event of an accident or explosion causing loss of life or serious personal injury in or about the well or while working on the well, the well operator or its contractor shall give notice, stating the particulars of the accident or explosion, to the oil and gas inspector and the Chief within twenty-four (24) hours.
3. Well work activities shall not constitute a hazard to the safety of persons.

Re: Monument Variance Request
F.L. Hoge H-14

Dear Mr. McLaughlin,

American Energy – Marcellus, LLC (AEM) respectfully requests a Plug and Abandoned Well Monument Variance for the F.L. Hoge H-14 in Wetzel County, West Virginia. AEM requests the authority to cut the wellbore 3 feet below the surface of the roadway.

AEM makes this request in order to proceed with constructing a Marcellus drill site from which to drill the Wiley N GRN WZ 1H, 2H, 3H, 4H, 5H, 6H, 7H, and 8H. The F.L. Hoge H-14 is along the access road to the Marcellus drill site. AEM requests this variance to ensure safety of the environment, employees, and contractors of AEM. Permits to drill these 6A wells were submitted to the West Virginia Department of Environmental Protection, Office of Oil and Gas March 13th, 2015.

I have included our proposed construction plans, a location exhibit, and a plug and abandon well survey for your review.

If you need any additional information, please feel free to contact me.

Best Regards,

MONUMENT VARIANCE

10301540P

The Office of Oil and Gas is considering granting a general variance to the requirements under 35CSR4-5.5b of erecting a monument upon the plugging of certain wells. If granted, the following conditions will be met:

- 1) the well will be surveyed and a plat constructed as required under 22-6 of the WV Code and 35CSR4,
- 2) a readily visible, permanent offset marker, in as close proximity as reasonably possible, will be erected and will provide distance and bearing information to the plugged well,
- 3) the plugging affidavit (form WR-38), will document the absence of a monument at the well location and document the existence and location of the offset marker,
- 4) a steel plate no smaller than one square foot shall be affixed to the well casing no deeper than three feet below the ground surface and be inscribed with the api number of the well.

To qualify under the general variance, an operator may make a variance request to the Chief of the Office of Oil and Gas for a specific well(s) in conjunction with a showing of good cause by the surface owner.

TO THE PERSONS NAMED ABOVE: You should have received this Form and the following documents:

- (1) The application to Plug and Abandon a Well on Form WW-4B, which sets out the parties involved in the work and describes the well its and the plugging work order; and
- (2) The plat (surveyor's map) showing the well location on Form WW-6.

The reason you received these documents is that you have rights regarding the application which are summarized in the instructions on the reverses side. However, you are not required to take any action at all.

Take notice that under Chapter 22-6 of the West Virginia Code, the undersigned well operator proposes to file or has filed this Notice and Application and accompanying documents for a permit to plug and abandon a well with the Chief of the Office of Oil and Gas, West Virginia Department of Environmental Protection, with respect to the well at the location described on the attached Application and depicted on the attached Form WW-6. Copies of this Notice, the Application, and the plat have been mailed by registered or certified mail or delivered by hand to the person(s) named above (or by publication in certain circumstances) on or before the day of mailing or delivery to the Chief.

 P.B.T.D.: 3293'
 4 1/2" Csg: 3313'

This well has experienced a sharp decline in injectivity. The injection into this well has decreased to less 5 BWPD and appears to be 60 or 70 bbl. below expected rate. We believe that this acid & mutual solvent pump away treatment could greatly improve injectivity.

1. Notify Oil and Gas Inspector that work is to begin.
2. MIRU Service unit and check TD. Have a water truck or a tank available to swab into.
3. Swab 4 1/2" casing until water returned is clean or until at least five runs off bottom. Save samples of material swabbed and label containers.
4. Dump 100 gals 28% HCl Acid w/ 2lbs. L58 Iron Control, 1/2 gal. F75N & 1/2 gal. A261 Inhibitor.
5. Allow Acid to soak for at least 1 hour.
6. Swab casing to remove spent acid & again catch samples of material swabbed and label containers.
7. Pump 750 gals 15% HCl Acid w/ 750 gal Mutual Solvent (Super Solve or U66), 7.5 lb. L58 Iron Control, 2 gal Aquet 835 Penetrant & 2 gal A261 Inhibitor. Run ten ball sealers and pump at matrix rate.
8. Load casing with water from injection line and return well to water injection carefully monitoring rate and pressure.
