Big Injun Sand	2157 -	2423
Stray Sand	2921 -	2932
Gordon Sand	2971 -	2980
Total depth		2980

The following remarks about the Garner pool appear on pp. 211-212 of Volume I(a):

"The Garner pool of Wetzel County was developed by the South Penn Oil Company, its first well having been drilled in 1899 on the land of Henry Garner in Proctor District, which occupies the northwestern corner of the county. This pool has proved very prolific, and has now been traced northeastward by the drill into Marshall County and nearly to the B. & O. R. R., near Loudanville.

"Lying as this belt does within five miles of the Ohio River at the nearest point, the westward thinning of the underground strata has diminished the interval between the Pittsburgh Coal and the Gordon Sand by about 100 feet, so that it measures only 2,000 feet, instead of 2,100 as in the region of the Pine Grove pool, 10 miles east from the Garner developments, as shown by the records which follow:"
