WELL WORK PLUGGING PERMIT
Vertical Plugging

US FISH AND WILDLIFE SERVICE
3982 WAVERLY RD.

WILLIAMSTOWN, WV 26187

Re: Permit approval for 4710780652
47-107-01811-00-00

This well work permit is evidence of permission granted to perform the specified well work at the location described on the attached pages and located on the attached plat, subject to the provisions of Chapter 22 of the West Virginia Code of 1931, as amended, and all rules and regulations promulgated thereunder, and to any additional specific conditions and provisions outlined in the pages attached hereto. Notification shall be given by the operator to the Oil and Gas Inspector at least 24 hours prior to the construction of roads, locations, and/or pits for any permitted work. In addition, the well operator shall notify the same inspector 24 hours before any actual well work is commenced and prior to running and cementing casing. Spills or emergency discharges must be promptly reported by the operator to 1-800-642-3074 and to the Oil and Gas Inspector.

Upon completion of the plugging well work, the above named operator will reclaim the site according to the provisions of WV Code 22-6-30. Please be advised that form WR-38, Affidavit of Plugging and Filling Well, is to be submitted to this office within 90 days of completion of permitted well work, as should form WR-34 Discharge Monitoring Report within 30 days of discharge of pits, if applicable. Failure to abide by all statutory and regulatory provisions governing all duties and operations hereunder may result in suspension or revocation of this permit and, in addition, may result in civil and/or criminal penalties being imposed upon the operators.

Per 35 CSR 4-5.2.g this permit will expire in two (2) years from the issue date unless permitted well work is commenced. If there are any questions, please feel free to contact me at (304) 926- 0450.

PERMIT CONDITIONS

West Virginia Code §22-6-11 allows the Office of Oil and Gas to place specific conditions upon this permit. Permit conditions have the same effect as law. Failure to adhere to the specified permit conditions may result in enforcement action.

CONDITIONS

1. All pits must be lined with a minimum of 20 mil thickness synthetic liner.
2. In the event of an accident or explosion causing loss of life or serious personal injury in or about the well or while working on the well, the well operator or its contractor shall give notice, stating the particulars of the accident or explosion, to the oil and gas inspector and the Chief within twenty-four (24) hours.
3. Well work activities shall not constitute a hazard to the safety of persons.
4. Notification shall be given by the operator to the Oil and Gas Inspector at least 24 hours prior to the construction of roads, locations and/or pits for any permitted work. In addition, the well operator shall notify the same inspector 24 hours before any actual well work is commenced and prior to running and cementing casing.

WELL WORK PERMIT

This permit, issued to NATURE CONSERVANCY OF WVA, is evidence of permission granted to perform the specified well work at the location described on the attached plat, subject to the provisions of Chapters 22 and 22B of the West Virginia Code of 1931, as amended, and all rules and regulations promulgated thereunder, and to all conditions and provisions outlined in the pages attached here to. Notification shall be given to the Oil and Gas Inspector GLEN ROBINSON at 304-863-8766 prior to the construction of roads, locations, and/or pits for any permitted work. In addition, the well operator shall notify the same inspector 24 hours before any actual well work is commenced and prior to setting plugs or pulling casing. Spills or emergency discharges must be reported to 1-800-654-3312.

Upon completion of the plugging well work the above named operator will reclaim the site according to the provisions of WV Code 22B-1-30. The above named operator will also file as required in WV Code 22B-1-23 an affidavit on form WR-38 by two experienced persons and the Oil and Gas inspector.

Failure to abide by all statutory and regulatory provisions governing all duties and operations here under may result in suspension or revocation of this permit and in addition may result in civil and/or criminal penalties.

Well work to be conducted under this permit shall be commenced within two (2) years from date of issue.

RE: Nature Conservancy Wells For P&A on Muskingum Island
Williams District, Wood County

Dear Jamie;

Enclosed is a Plat of Survey for Muskingum Island Well No.3, the third well plugged on Muskingum Island by Shreve Well Service last week.

Also enclosed is a corrected Plat for Muskingum Island Well No.1. The original Plat dated 7/22/93 incorrectly showed Muskingum Island No.4 to be Muskingum Island No.1. Well No.1 was P&A'd the week of 8/1/93 and this Plat shows its correct location as well as that of Well No.4 .

I apologize for any confusion this may have caused. If you have any further questions concerning this matter, please call me at 420-1220.

Sincerely,

Timothy P. Roush

Dear Mr. Elam:

I refer to the pre-construction notification (PCN) requesting a Department of the Army (DA) authorization for the discharge of dredged and/or fill material into waters of the United States (U.S.) in association with the construction of the Muskingum Island Well Plugging Project. The project is located off the shore of Muskingum Island, in Wood County, West Virginia. The proposed activity is located at approximately 39.3647991° N, 81.5124644° W. Your PCN has been assigned the following file number: LRH-2024-00191-OHR-Ohio River Mile Point 175. Please reference this number on all future correspondence related to this project.

The U.S. Army Corps of Engineers' (Corps) authority to regulate waters of the U.S. is based on the definitions and limits of jurisdiction contained in 33 CFR Part 328 and 33 CFR Part 329. Section 404 of the Clean Water Act (Section 404) requires a DA permit be obtained prior to discharging dredged and/or fill material into waters of the U.S., including wetlands. Section 10 of the Rivers and Harbors Act of 1899 (Section 10) requires a DA permit be obtained for any work in, on, over, or under a navigable water. The Ohio River is a traditional navigable waterway subject to regulation under both Section 404 and Section 10.

The proposed project, as described in the submitted information, has been reviewed in accordance with Section 404 and Section 10. Based on your description of the proposed work, and other information available to us, it has been determined that this project will involve activities subject to the requirements of Section 10 and Section 404.

In the submitted PCN materials, you have requested a DA authorization for the permanent and temporary discharges of dredged and/or fill material in association with construction of the Muskingum Island Well Plugging Project. The proposed project would include permanently sealing five (5) orphaned wells adjacent to Muskingum Island in the Ohio River. The proposed action comprises of four (4) primary components: mussel salvage and relocation; gaining access

to wells by dredging space for a work barge; well plugging/sealing; and monitoring mussel status in the proposed relocation area.

Based on the information provided, well access is a requisite in advance of initiating plugging efforts; therefore, the riverbed would be dredged to remove sediment near each well location to afford work barge access. Prior to dredging and regardless of method, sediment curtains would be installed around the overall dredge site to reduce the amount of sediment entering the river. During dredging activities, materials would be removed to the extent required for barge access to the site. Dredged material would be removed and loaded into a hopper barge for lime treatment, temporary storage, and transport to an approved, existing upland landfill. The hopper barge would be anchored to the work barge or moored with spuds adjacent to each well. Based on the information provided, dredging and well site set-up is anticipated to take up to three (3) days per well and up to 15 days in total. The well casings would be cleaned using pressurized water to blow material out of the well and to accommodate insertion of the hose for the installation of liquid concrete, poured in the dry, into each well. Any recovered water and debris would be held in tanks and disposed of as produced water. A minimum of four (4) plugs would be installed at each of the five (5) wells. Following well sealing, the cellar and oil boom would be removed, a monument would be placed to mark the site, and all equipment is removed. Based on the information provided, the well plugging activities would require up to 12 days per well, 60 days in total. As indicated, the purpose of the proposed project is maintenance on existing structures, specifically, sealing five (5) orphaned wells at the subject location.

Based on the provided information, it has been determined the proposed work along the Ohio River, as described above, associated with the Muskingum Island Well Plugging Project meets the criteria for Nationwide Permit (NWP) No. 3 under the January 8, 2026, Federal Register (FR), Reissuance and Modification of NWPs (91 FR 768), provided you comply with all terms and conditions of the enclosed material, the enclosed special conditions, and the general Section 401 Water Quality Certification (401 WQC) issued by the West Virginia Department of Environmental Protection. A copy of this NWP can be found on our website at the following link: [https://publibrary.sec.usace.army.mil/api/download?id=dc7fab19-9d83-485b-c222-6844eac25f96&filename=FINAL%20WV%20District PN RCWQC 2026%20NWPs MAR%202026%20with%20attatchments.pdf&token=&preview=true](https://publibrary.sec.usace.army.mil/api/download?id=dc7fab19-9d83-485b-c222-6844eac25f96&filename=FINAL%20WV%20District%20PN%20RCWQC%202026%20NWPs%20MAR%202026%20with%20attachments.pdf&token=&preview=true).

Please be aware this NWP No. 3 verification does not obviate the requirement to obtain other local, state, and/or federal authorizations required by law for these activities. This verification is valid until the expiration date of the NWPs, unless the NWP authorization is modified, suspended, or revoked. The verification will remain valid if the NWP authorization is reissued without modification or the activity complies with any subsequent modification of the NWP authorization. All of the existing NWPs are scheduled to be modified, reissued, or revoked on March 15, 2031. Prior to this date, it is not necessary to contact this office for re-verification of your project unless the plans for the proposed activity are modified. Furthermore, if you commence or under contract to commence this activity before March 15, 2031, you will have 12 months from the date of the modification or revocation of the NWP to complete the activity under the present terms and conditions of this NWP.

Authorization of work or structures by this permit does not convey a property right, nor authorize any injury or invasion of other rights [33 CFR 320.4(g)]. Within the Huntington District's regulatory boundaries in the State of West Virginia we understand this project may

include work on a property on which the government may own or retain an easement. The attached Blanket Consent to Easement, dated January 2, 2026, has been granted by the Corps' Real Estate Division to perform work upon properties which are owned or where the Government retains an easement. If you have any questions regarding this Blanket Consent to Easement, you should contact Ms. Katie Conn with the Corps' Real Estate Division by telephone at (304)-207-3359, or by email at Katie.D.Conn@usace.army.mil.

For activities requiring the use of marine-based equipment, after the date for the commencement of work is determined; you must notify the USACE Huntington District Waterways Section using the attached Notice to Navigation Interests Information Form. This information must be provided at least 14 days, but no more than 20 days, prior to the start of work. You may contact the Huntington District Waterways Section at 304-399-5694.

Please be aware this NWP authorization does not obviate the requirement to obtain other federal, state or local authorizations required by law. Enclosed is a copy of this NWP and the Section 401 WQC to be kept at the project site during construction. You shall supply a copy of these documents to your project engineer responsible for construction activities.

Upon completion of the work, the enclosed certification must be signed and returned to this office. If you have any questions concerning the above, please contact Rachel McCarty of the Energy Resource Branch at 304-807-0826, by mail at the above address, or by email at: rachel.a.mccarty@usace.army.mil.

Sincerely,

Lauren Pritt

**Nationwide Permit No. 3 Verification Special Conditions for the
Ohio River Islands National Wildlife Refuge – Muskingum Island Well Plugging Project
LRH-2024-00191-OHR-Ohio River Mile Point 175**

1 of 3

1. All work will be conducted in accordance with the submitted pre-construction notification for the Muskingum Island Well Plugging Project received in this office on August 7, 2025.
2. Enclosed is a copy of Nationwide Permit 3, which will be kept at the site during construction. A copy of the Nationwide Permit 3 verification, special conditions, and the attached construction plans must be kept at the site during construction. The permittee will supply a copy of these documents to their project engineer responsible for construction activities.
3. Upon completion of the activity authorized by these Nationwide Permit 3 verification, the enclosed certification must be signed and returned to this office along with as-built drawings showing the location and configuration, as well as all pertinent dimensions and elevations of the activity, including the photographs of the restored temporarily affected aquatic resources, authorized under this Nationwide Permit 3 verification.
4. The permittee must notify the United States Army Corps of Engineers (Corps)-Huntington District Waterways Section prior to construction of the Muskingum Island Well Plugging Project. A copy of a Notice to Navigation Information Form for providing the information with contact information is included in the permit package. This form must be completed and returned to the Corps-Huntington District Waterways Section at least 14 days, but no more than 20 days, prior to the start of work. The Corps-Huntington District Waterways Section may be contacted at (304) 399-5694.
5. Prior to the initiation of any work authorized by the Nationwide Permit 3 verification, appropriate site-specific best management practices (BMPs) for sediment and erosion control will be fully implemented during construction activities at the site. Appropriate bank protection measures will be installed in channel or on barren areas requiring erosion control including, but are not limited to, native grasses and forbs, vegetation, and other acceptable clean non-contaminated material. Immediately after completion of the final grading of the land surface, all slopes, land surfaces, and filled areas shall be appropriately stabilized to prevent erosion. The erosion control measures shall remain in place and be maintained until all authorized work is completed and the work areas are stabilized. Construction activities will be performed during low flow conditions to the greatest extent practicable.
6. No area for which grading has been completed will be unseeded or unmulched for longer than fourteen (14) days. All disturbed areas will be seeded and/or revegetated with native species and approved seed mixes (where practicable) after completion of construction activities for stabilization and to help preclude the establishment of non-native invasive species.

**Nationwide Permit No. 3 Verification Special Conditions for the
Ohio River Islands National Wildlife Refuge – Muskingum Island Well Plugging Project
LRH-2024-00191-OHR-Ohio River Mile Point 175
2 of 3**

7. All water resources and their buffers, which are to be avoided on-site, must be clearly indicated on the site plans and drawings, demarcated in the field, and protected with suitable material prior to site disturbance. These materials must remain in place and be maintained throughout the construction process.
8. In the event any previously unknown historic or archaeological sites or human remains are uncovered while accomplishing the activity authorized by this nationwide permit authorization, the permittee must cease all work in waters of the U.S. immediately and contact local, state and county law enforcement offices (only contact law enforcement on findings of human remains), the Corps at 304-399-5610 and West Virginia State Historic Preservation Office at 304-558-0220. The Corps will initiate the Federal, state and tribal coordination required to comply with the National Historic Preservation Act and applicable state and local laws and regulations. Federally recognized tribes are afforded a government-to-government status as sovereign nations and consultation is required under Executive Order 13175 and 36 CFR Part 800.
9. This Department of the Army Permit authorization does not authorize the “take” of a threatened or endangered species as defined under the Endangered Species Act (ESA). In the absence of separate authorization (e.g., an ESA Section 10 Permit, a Biological Opinion (BO) with “incidental take” provisions, etc.) from the United States Fish and Wildlife Service (USFWS), both lethal and non-lethal “take” of protected species are in violation of the ESA. The enclosed Biological Opinion, titled *Ohio River Islands Well Plugging, Wood County, West Virginia* (Service File Number 2025-0018623), dated June 20, 2025, contains mandatory terms and conditions to implement the reasonable and prudent measures that are associated with the “incidental take” that is also specified in the BO. Your authorization under this permit is conditional upon your compliance with all of the mandatory terms and conditions associated with incidental take of the attached BO, which terms and conditions are incorporated by reference in this permit. Failure to comply with the terms and conditions associated with incidental take of the BO, where a take of the listed species occurs, would constitute an unauthorized take, and it would also constitute noncompliance with your Corps’ permit. The USFWS is the appropriate authority to determine compliance with the terms and conditions of its Biological Opinion, and with the ESA.
10. Reinitiation of formal consultation is required where discretionary Federal agency involvement or control over the action has been retained (or is authorized by law) and if (1) the amount or extent of incidental take is exceeded; (2) new information reveals effects of the agency action that may affect listed species or critical habitat in a manner or to an extent not considered in this opinion; (3) the action is subsequently modified in a manner that causes an effect to the listed species or critical habitat not considered in the attached Biological Opinion or, (4) a new species is listed or critical habitat is designated that may be affected by the action. In instances where the amount or extent of incidental take is exceeded, any operations causing such a take must cease pending reinitiation.

3 of 3**

11. Section 7 obligations under the ESA must be reconsidered if new information reveals impacts of the project that may affect Federally-listed species or critical habitat in a manner not previously considered, the proposed project is subsequently modified to include activities which were not considered during Section 7 consultation with the USFWS, or new species are listed or critical habitat designated that might be affected by the subject project.
12. Should new information regarding the scope and/or impacts of the project become available that was not submitted to this office during our review of the proposal, the permittee will submit written information concerning proposed modification(s) to this office for review and evaluation, as soon as practicable.

Subject: Well plugging at Muskingum Island
Date: March 23, 2026 at 8:59 AM
To: Brian Jarvis brian.jarvis@hydrocarbonwell.com

Brian,

I have been informed of a clause in the USACE Nationwide permit process whereas if the USACE does not reply within 45 days (with certain parameters met) we can proceed with the project.

Based on that, you can plan on beginning work on the riverine well sites at your earliest convenience - I'm sure the weather and corresponding river levels will have something to say about that this time of year.

Regards,

Victor Elam

TO THE PERSONS NAMED ABOVE: You should have received this Form and the following documents:

- (1) The application to Plug and Abandon a Well on Form WW-4B, which sets out the parties involved in the work and describes the well its and the plugging work order; and
- (2) The plat (surveyor's map) showing the well location on Form WW-6.

The reason you received these documents is that you have rights regarding the application which are summarized in the instructions on the reverses side. However, you are not required to take any action at all.

Take notice that under Chapter 22-6 of the West Virginia Code, the undersigned well operator proposes to file or has filed this Notice and Application and accompanying documents for a permit to plug and abandon a well with the Chief of the Office of Oil and Gas, West Virginia Department of Environmental Protection, with respect to the well at the location described on the attached Application and depicted on the attached Form WW-6. Copies of this Notice, the Application, and the plat have been mailed by registered or certified mail or delivered by hand to the person(s) named above (or by publication in certain circumstances) on or before the day of mailing or delivery to the Chief.

4710780652

INSTRUCTIONS TO SURFACE OWNERS NAMED ON PAGE WW4-A

The well operator named on page WW-4A is applying for a permit from the State to plug and abandon a well. (Note: If the surface tract is owned by more than three persons, then these materials were served on you because your name appeared on the Sheriff's tax ticket on the land or because you actually occupy the surface tract. In either case, you may be the only owner who will actually receive these materials.) See Chapter 22 of the West Virginia Code. Well work permits are valid for 24 months. If you do not own any interest in the surface tract, please forward these materials to the true owner immediately if you know who it is. Also, please notify the well operator and the Office of Oil and Gas.

NOTE: YOU ARE NOT REQUIRED TO FILE ANY COMMENT.
WHERE TO FILE COMMENTS AND OBTAIN ADDITIONAL INFORMATION:

Chief, Office of Oil and Gas
Department of Environmental Protection
601 57th St. SE
Charleston, WV 25304
(304) 926-0450

RECEIVED
Office of Oil and Gas
JUN 25 2026
WV Department of
Environmental Protection

Time Limits and methods for filing comments. The law requires these materials to be served on or before the date the operator files his Application. You have **FIVE (5) DAYS** after the filing date to file your comments. Comments must be filed in person or received in the mail by the Chief's office by the time stated above. You may call the Chief's office to be sure of the date. Check with your postmaster to ensure adequate delivery time or to arrange special expedited handling. If you have been contacted by the well operator and you have signed a "voluntary statement of no objection" to the planned work described in these materials, then the permit may be issued at any time.

Comments must be in writing. Your comments must include your name, address and telephone number, the well operator's name and well number and the approximate location of the proposed well site including district and county from the application. You may add other documents, such as sketches, maps or photographs to support your comments.

The Chief has the power to deny or condition a well work permit based on comments on the following grounds:

- 1) The proposed well work will constitute a hazard to the safety of persons.
- 2) The soil erosion and sediment control plan is not adequate or effective;
- 3) Damage would occur to publicly owned lands or resources;
- 4) The proposed well work fails to protect fresh water sources or supplies;
- 5) The applicant has committed a substantial violation of a previous permit or a substantial violation of one or more of the rules promulgated under Chapter 22, and has failed to abate or seek review of the violation..."

If you want a copy of the permit as it is issued or a copy of the order denying the permit, you should request a copy from the Chief.

VOLUNTARY STATEMENT OF NO OBJECTION

I hereby state that I have read the instructions to surface owners and that I have received copies of a Notice and Application For A Permit To Plug And Abandon on Forms WW-4A and WW-4B, and a survey plat.

I further state that I have no objection to the planned work described in these materials, and I have no objection to a permit being issued on those materials.
