Re: Land Application Permit Termination

Nytis Exploration Company, LLC Horizontal Coal Bed Methane Wells WPCH-211A and WPCH-211B GP Land Application Permit Number GP-WV1-07-10902544 Wyoming County, West Virginia API # 47-109-02545 API # 47-109-02544

Dear Mr. Lockwood:

This letter serves as documentation that the land application system for produced water has been terminated at the above referenced horizontal coal bed methane (CBM) wells. Diversified Gas and Oil Corporation acquired Nytis Exploration, LLC on May 26,2020. Due to the lack of production, the land application system was no longer needed. Thus, the land application system was removed by Diversified Production LLC personnel on 4/28/2021.

All discharge pipes and valve settings associated with the land application system were removed.
