Formation	Color	Hard or Soft	Top	Bottom	Oil, Gas or Water	Depth Found	Remarks
Top of Salt Sand				1452			
First Oil			1531	1535			
Second Oil			1541	1557			
Total Depth				1563'			
<p>Fresh water broke in on well in 1940, June, and string of 5-3/16" pipe was run with an anchor packer. Water again broke in on the well in April 1948. The 5-3/16" pipe had to be pulled. When the tools were run, in the hole had badly caved and we started to clean out but as there is iron in the hole, we could not clean out below 1481' On top of the iron there is some cavings packed down hard and am sure that there is no water going down the hole. It is in the Salt Sand and only 82' off bottom and only 50' from the top of the first oil pay.</p>
