Extended lateral length

HG ENERGY II APPALACHIA, LLC

The Office of Oil and Gas has reviewed the attached permit modification for the above referenced permit. The attached modification has been approved and well work may begin. Please be reminded that the oil and gas inspector is to be notified twenty-four (24) hours before permitted well work is commenced.

If there are any questions, please feel free to contact me at (304) 926-0450.

19) Describe proposed well work, including the drilling and plugging back of any pilot hole:

Drill the vertical depth to the Marcellus at an estimated total vertical depth of approximately 6760 feet. Drill horizontal leg to estimated 18,789' lateral length, 26,155' TMD. Hydraulically fracture, stimulate and be capable of producing from the Marcellus Formation. Should we encounter an unanticipated void in the coal, we will install a minimum of 20' of casing below the void but not more than 100' below the void, set a basket and grout to surface. We plan to run an ACP above the Gantz/Dominion Storage interval to aid in sealing off and isolating the storage interval.

20) Describe fracturing/stimulating methods in detail, including anticipated max pressure and max rate:

The stimulation will be completed with multiple stages divided over the lateral length of the well. Stage spacing is dependent upon engineering design. Slickwater fracturing technique will be utilized on each stage using sand, water, and chemicals. See attached list. Maximum pressure not to exceed 12,500 psi.

- 21) Total Area to be disturbed, including roads, stockpile area, pits, etc., (acres): 14.36 acres
- 22) Area to be disturbed for well pad only, less access road (acres): 6.26 acres
- 23) Describe centralizer placement for each casing string:

No centralizers will be used with conductor casing.
Freshmeter/Coal - centralized every 3 joins to surface.
Intermediate 1 - Sew Spring on every joint, will also be unking ACP for isolating storage zone
Intermediate 1 - Sew Spring on serial joint will also be unking ACP for isolating storage zone
Intermediate 2 - Sew Spring on serial joint to file of the Lord of the Council Spring Spring on Serial Joint Spring S

RE: Evans 1213 S-5H Request for Permit Revision – (47-041-05721)

Freemans Creek District, Lewis County, West Virginia

Request for Modification Due to Acquiring Additional Leases

10/15/2021 82,500.00

Dear Mr. Blevins -

Per our discussions, enclosed are revised forms (survey plat, mylar, WW-6B, casing schematic, and WW6A-1) for the requested 1213 S-5H well work permit revision. Also included is a check to cover the cost of requesting a modification for an existing permit. We ask the permit be modified to reflect additional leases acquired to lengthen the lateral.

Please let me know if you have any questions or require additional information. I can be reached at (304) 420-1119 or dwhite@hgenergyllc.com.

Very truly yours, Diane White
