## L. J. RINEHART NO. 1 WELL.

Grant District, Ritchie County, W. Va.

By Benedum-Trees Oil Co., Pittsburgh, Pa.

Located 4.51 mi. S. of  $39^{\circ} 20'$  and 1.20 mi. W. of  $81^{\circ} 10'$  - SW - St. Marys Quadrangle.  
Elevation, 630'. L.

Permit Rit-941.

Boring commenced March 13, 1942; completed Sept. 15, 1942.

Dry hole.

According to the structure contour map, the well starts in the lower part of the Dunkard, 70 feet below the Washington Coal.

Section is based on examination by J. H. C. Martens of samples from 307 to 5663', 6498-6590', and 7165-7280', and on driller's record.

Record to RCT from Martens April 23, 1945.

Top.	Bottom.	Thickness.	PENNSYLVANIAN, 1280+ FEET
307	314	7	Siltstone, green, micaceous
314	324	10	Shale, red and green, with limestone nodules
324	337	13	Shale, red
337	350	13	Limestone, green, fine, slightly calcareous, 60%; green and red shale, 40%
350	353	3	Limestone, gray to brown, silty
353	359	6	Clay, gray, 40%; very light brown limestone, 40%; black shale with trace of coal, 20%
359	362	3	Shale, green, very silty
362	367	5	Siltstone, green
367	380	13	Siltstone and silty shale, gray, micaceous
380	390	10	Coal, 40%; light-gray shale and clay, 50%; light-brown limestone, 10%
390	400	10	Coal, 40%; light-gray shale and clay, 40%; light-brown limestone, 20%
400	408	8	Limestone, light-gray to brownish, pyritic
408	416	8	Clay and soft shale, red, calcareous
416	462	46	Siltstone, green, micaceous, with siderite spherulites; also some green shale; small amounts of calcareous material
462	483	21	Sandstone, light-green, fine to very fine, micaceous
483	498	15	Shale or mudstone, red, yellow, gray, and dark-gray, highly calcareous
498	506	8	Shale, red, 50%; green calcareous siltstone and fine sandstone, 50%
506	518	12	Shale, red; also some green shale and light-brown limestone
518	542	24	Clay, red and yellow, with much impure limestone
542	570	28	Shale, red, with a few calcareous nodules
570	576	6	Clay, red and yellow, with limestone nodules
576	581	5	Limestone, nearly white, very fine textured
581	618	37	Clay, red and yellow, with limestone nodules
618	625	7	Limestone, light-gray, very fine textured, clayey
625	634	9	Sandstone, light-green, fine, calcareous
634	650	16	Shale, red and green, with limestone nodules
650	693	42	Shale, green, silty; small amount of limestone
692	704	12	Clay, gray, calcareous
704	744	40	Clay, red, calcareous; many small limestone nodules
744	751	7	Shale, green, calcareous
751	765	14	Sandstone, green, fine, silty, calcareous
765	792	27	Clay, red and yellow, calcareous; many small limestone nodules
792	800	8	Siltstone, light-green
800	812	12	Shale and siltstone, grayish-green
812	818	6	Shale, green
818	834	16	Siltstone and silty shale, dark-gray

(OVER)

## L. J. RINGHART NO. 1 WELL (Continued) (Page 2).

Top.	Bottom.	Thickness.	Description
834	849	15	Sandstone, light-gray to greenish, fine, micaceous
849	855	6	Siltstone, gray, shaly
855	865	10	Shale, dark-gray
865	878	13	Shale, dark-gray to black, pyritic; contains fossil shells
878	883	5	Clay, red, calcareous, 70%; fossiliferous black shale, 25%; coal, 5%
883	890	7	Clay, red, calcareous
890	916	26	Sandstone, white, medium-grained
916	936	20	Shale, green, silty, with siderite spherulites
936	943	7	Siltstone, green, micaceous
943	960	17	Shale, green
960	966	6	Siltstone, light-gray, calcareous
966	975	9	Sandstone, nearly white, fine, calcareous
975	998	23	Siltstone, and shale, grayish-green
998	1007	9	Shale, light-gray, soft, not distinctly laminated
1007	1026	19	Siltstone, gray
1026	1062	26	Sandstone, white, coarse
1052	1057	5	Siltstone, gray
1057	1063	6	Shale, gray, silty
1063	1088	25	Siltstone, gray, shaly
1088	1104	16	Shale and siltstone, gray
1104	1112	8	Shale, light-gray, with siderite spherulites
1112	1135	23	Siltstone, gray, sandy
1135	1145	10	Shale, light-gray to nearly white; trace of coal and black shale
1145	1162	17	Clay or soft shale, white, silty; contains many siderite spherulites; some fragments have conchoidal fracture
1162	1175	13	Shale, gray, soft
1175	1218	43	Sandstone, light-gray to white, medium-grained
1218	1227	9	Shale, dark-gray, silty
1227	1239	12	Sandstone, gray, very fine, 50%; dark-gray to black shale, 45%; coal, 5%
1239	1272	33	Siltstone, dark-gray, shaly
1272	1282	10	Sandstone, light-gray, fine
1282	1297	15	Sandstone, white, medium-grained (oil and gas, 1293')
1297	1310	13	Sandstone, gray; with black streaks, fine
1310	1330	20	Shale and siltstone, gray to dark-gray
1330	1400	70	Sandstone, white to light-gray, medium-grained
1400	1420	20	Shale; dark-gray, silty
1420	1429	9	Siltstone, gray
1429	1439	10	Shale; black, silty
1439	1500	61	Sandstone, nearly white, medium- to fine-grained; contains small specks of mica, chlorite, siderite, and carbonaceous material
1500	1514	14	Coal and black shale, 50%; gray siltstone, 30%; coarse white sandstone, 20% (coal at 1512-1515' in record)
1514	1524	10	Sandstone, light-gray, very fine
1524	1563	39	Sandstone, white, coarse to very coarse, nearly all quartz; some rust stains on grains, 1535-1551' (oil and gas, 1535-1558'; salt water, 1558-1577')
1563	1575	12	Sandstone; white; medium-grained, nearly all quartz
1575	1587	12	Sandstone, white to brown, fine, 40%; nearly white shale, 30%; black shale, 25%; siderite, 5%
			GREENBRIER LIMESTONE, 68 FEET
1587	1603	16	Limestone, very light brown
1603	1608	5	Limestone, very light brown, 90%; green shale, 10%
1608	1613	5	Limestone, very light brown, somewhat oolitic

(Continued on page 3)

L. J. RINEHART NO. 1 WELL (Continued) (Page 3).

Top. Bottom. Thickness.

1613 - 1617	4	Limestone, very light brown, sandy
1617 - 1627	10	Sandstone, white and light-brown, fine, calcareous
1627 - 1632	5	Limestone, very light brown, oolitic
1632 - 1640	8	Limestone, nearly white, oolitic, slightly sandy
1640 - 1655	15	Limestone, nearly white, very sandy; larger grains are rounded and frosted; slightly dolomitic, 1645-1655'
		POCONO FORMATION, 500 FEET
1655 - 1662	7	Sandstone, nearly white, fine
1662 - 1670	8	Siltstone, light-gray, sandy, with siderite spherulites
1670 - 1720	50	Sandstone, white, with green and brown specks, fine
1720 - 1746	26	Sandstone, white, fine- to medium-grained; a little dark shale and siltstone, 1731-1746'
1746 - 1755	9	Sandstone, white, coarse
1755 - 1777	22	Shale, dark-gray, silty
1777 - 1787	10	Shale and siltstone, dark-gray
1787 - 1792	5	Sandstone, light-brown, very fine, dolomitic
1792 - 1796	4	Sandstone, light-brown, fine, calcareous and dolomitic
1796 - 1807	11	Sandstone, light-gray, very fine
1807 - 1822	15	Shale, dark-gray, with sandy streaks.
1822 - 1834	12	Shale and siltstone, gray
1834 - 1850	16	Siltstone, light-gray
1850 - 1860	10	Sandstone, very light gray, very fine, moderately calcareous
1860 - 2008	148	Siltstone and shale, gray; siltstone predominates in most samples and the greater part of the shale is silty
2008 - 2144	136	Shale, gray, silty, 70%; lighter gray siltstone, 30%; last sample marked 2130-2144' contains about 10% of very dark gray shale
2144 - 2155	11	Shale, very dark gray, 20%; nearly white, very fine sandstone with specks of pyrite, 10%; gray siltstone with some silty shale, 70% (Sunbury Shale and Berea Sandstone; unless some of the siltstone belongs with the Berea, the Berea is estimated to be about one foot thick and to be at or a little above 2150')
		DEVONIAN SHALES, 2458 FEET
2155 - 2327	172	Siltstone, gray to grayish-green, shaly, slightly calcareous; contains a few fossil shells
2327 - 2350	23	Siltstone, gray to grayish-green, as above, 90%; grayish-red siltstone, 10%
2350 - 2397	47	Siltstone, gray to grayish-green
2397 - 2430	33	Siltstone, gray to grayish-green, 70%; grayish-red siltstone and silty shale, 30%
2430 - 2482	52	Siltstone, grayish-green, 70 to 80%; gray shale, 30 to 20%
2482 - 2510	28	Siltstone, grayish-green, shaly, 80%; grayish-red siltstone, 20%
2510 - 2537	27	Shale, gray, silty, 70%; gray siltstone, 30%
2537 - 2579	42	Siltstone, gray, green, and white, 70 to 80%; gray and grayish-red shale, 30 to 20%; some very fine sandstone included with siltstone
2579 - 2665	86	Siltstone, gray and green; small amounts of gray shale
2665 - 2680	15	Shale, grayish-green, very silty
2680 - 2982	302	Siltstone, gray to grayish-green, 60 to 80%; gray, silty shale, 40 to 20%
2982 - 2995	13	Shale, gray, very silty
2995 - 3100	105	Siltstone, gray, fine, shaly, 60 to 80%; gray shale, 40 to 20%
3100 - 3242	142	Shale, gray, a little darker than that above, interstratified with small amounts of siltstone
3242 - 3340	98	Shale and siltstone, gray; very similar to interval above, but amount of siltstone is larger and varies from 30 to 50%

(OVER) (Page 4)

L. J. RINEHART NO. 1 WELL (Continued) (Page 4).

Top. Bottom. Thickness.

3340 - 3616	276	Siltstone, gray to light-brown, mostly shaly, 50 to 60%; gray shale, 40 to 20%; very dark gray shale, 10 to 30%
3616 - 3765	149	Shale and siltstone, gray; average composition is about 50% each of shale and siltstone, but there are considerable variations from this in individual samples
3765 - 3777	12	Siltstone, gray and light-gray, shaly
3777 - 3869	92	Siltstone, gray, shaly, 70 to 80%; gray shale, 30 to 20%
3869 - 3975	106	Shale, gray; small amounts of gray siltstone and very dark gray shale
3975 - 3994	19	Shale, gray, 50%; gray to light-brown siltstone, 35%; very dark gray shale, 15%
3994 - 4525	531	Shale, dark-gray, with some lighter gray interbedded siltstone; small veins of dolomite, 4253-4270' and 4341-4354' (variations in color and texture in individual samples from 3994 to 5613' not described in detail)
4525 - 4572	47	Shale, dark-gray, with some lighter gray siltstone and a few fragments of brown to gray fine-textured limestone
4572 - 5200	628	Shale, dark-gray to very dark gray; small amount of fine siltstone
5200 - 5506	306	Shale, black to dark-gray
5506 - 5620	114	Shale, black
5620 - 5630	10	Shale, black, 80%; brown fossiliferous limestone, 20%
		HUNTERSVILLE CHERT, 221 FEET
5613		Depth corrected from 5630 to 5613' by SLIM
5613 - 5642	29	No sample
5642 - 5650	8	Limestone, brown, with a little chert, 60%; black shale, 40%
5650 - 5663	13	Limestone, brown, very cherty, 50%; black shale, 50%
		5834 Bottom of "Cerniferous Lime" in record
		ORISKANY SANDSTONE, 77 FEET
5834 - 5911	77	Sand (show of gas, 5849-5850')
		HELDERBERG, SALINA, AND LOCKPORT, 1420 FEET
5911 - 6498	587	No samples
6498 - 6523	25	Dolomite-anhydrite rock, brown, very fine textured
6523 - 6528	5	Salt, nearly pure
6528 - 6575	47	Salt, with some dolomite and anhydrite
6575 - 6588	13	Salt and anhydrite
6588 - 6598	10	Dolomite, brown, very fine textured, with some salt and anhydrite
6598 - 6606	8	Lime (no samples to 7165'; information from diller's record)
6606 - 6621	15	Salt
6621 - 7055	434	Lime
7055 - 7088	33	Sand
7088 - 7165	77	Lime (salt water, 7070 to 7079')
7165 - 7206	41	Dolomite, brown to gray, 60 to 80%; dark-gray to black shale, 40 to 20%
7206 - 7280	74	Dolomite, brown, very finely crystalline
7280 - 7331	51	No samples; recorded as lime
		Total depth
