Ms. Thornton,

I received a notification of non-compliance for the Marker 3 WR-35 dated June 21, 2016. As you can see below, I sent what I could on March 28, 2016. After looking again at my email, I noticed the scan was cut off so I am sending again with the WR-35 (form in use by DEP at time of well completion). I could provide no further information on this well from 13 years ago than what is included on this form and the previously provided handwritten notations and daily drilling reports that were in file.

Thank you,

Doug Douglass

Ms. Thornton,

Please find attached the WR 35 for the Marker 3 to the best of our ability. Other than the fact that we did not file completion reports for wells that actually were not completed, Reserve is quite confident that the older required reports were mailed or provided directly to the DEP Inspector at the time. There have been other instances in the past where the records could not be found at DEP but we had copies to show their submission. Unfortunately, I was unable to find that copy for the Marker #3 so it has been created anew from the records available.

Thank you,

Doug Douglass

Mr. Douglass,

We have reviewed the below email and determined that you need to take the notes and attempt to fill out a WR-35 form as completely as you can. Also you'll need to include an explanation as to why it isn't completed. We understand that the well was drilled several years ago but that does not alleviate you of your reporting requirements. That is why we have the 90 day deadline on reports so that the drillers and inspectors will be available to fill out the required documentation. Please have us the information by April 18, 2016.

Gene,

I have attached the WR 34 discharge monitoring report for the Marker 3. I have been unable to find the WR 35 in the file from this well drilled in 2003. I have attached some handwritten notations that I found and the daily drilling reports but am unable to provide anything further from the file. Anything else would be newly created without the driller or inspector at the time.

Thanks,
