WELL WORK PLUGGING PERMIT

Plugging

This permit, API Well Number: 47-9500700, issued to SANCHO OIL & GAS CORPORATION, is evidence of permission granted to perform the specified well work at the location described on the attached pages and located on the attached plat, subject to the provisions of Chapter 22 of the West Virginia Code of 1931, as amended, and all rules and regulations promulgated thereunder, and to all conditions and provisions outlined in the pages attached hereto. Notification shall be given by the operator to the Oil and Gas Inspector at least 24 hours prior to the construction of roads, locations, and/or pits for any permitted work. In addition, the well operator shall notify the same inspector 24 hours before any actual well work is commenced and prior to running and cementing casing. Spills or emergency discharges must be promptly reported by the operator to 1-800-642-3074 and to the Oil and Gas inspector.

Upon completion of the plugging well work, the above named operator will reclaim the site according to the provisions of WV Code 22-6-30. The above named operator will also file, as required in WV Code 22-6-23, an affidavit on form WR-38 by two experienced persons in the operator's employment and the Oil and Gas inspector that the work authorized under this permit was performed and a description given. Failure to abide by all statutory and regulatory provisions governing all duties and operations here under may result in suspensions or revocation of this permit and in addition may result in civil and/or criminal penalties being imposed upon the operator.

This permit will expire in two (2) years from date of issue. If there are any questions, please free to contact me at (304) 926-0499 ext. 1654.

James Martin
Chief

Operator's Well No: NOLAN 2
Farm Name: NOLAN, CARL W.

PERMIT CONDITIONS

West Virginia Code §22-6-11 allows the Office of Oil and Gas to place specific conditions upon this permit. Permit conditions have the same effect as law. Failure to adhere to the specified permit conditions may result in enforcement action.

CONDITIONS

1. All pits must be lined with a minimum of 20 mil thickness synthetic liner.
2. In the event of an accident or explosion causing loss of life or serious personal injury in or about the well or while working on the well, the well operator or its contractor shall give notice, stating the particulars of the accident or explosion, to the oil and gas inspector and the Chief within twenty-four (24) hours.
3. Well work activities shall not constitute a hazard to the safety of persons.

TO THE PERSONS NAMED ABOVE: You should have received this Form and the following documents:

- (1) The application to Plug and Abandon a Well on Form WW-4B, which sets out the parties involved in the work and describes the well its and the plugging work order; and
- (2) The plat (surveyor's map) showing the well location on Form WW-6.

The reason you received these documents is that you have rights regarding the application which are summarized in the instructions on the reverse side. However, you are not required to take any action at all.

Take notice that under Chapter 22-6 of the West Virginia Code, the undersigned well operator proposes to file or has filed this Notice and Application and accompanying documents for a permit to plug and abandon a well with the Chief of the Office of Oil and Gas, West Virginia Department of Environmental Protection, with respect to the well at the location described on the attached Application and depicted on the attached Form WW-6. Copies of this Notice, the Application, and the plat have been mailed by registered or certified mail or delivered by hand to the person(s) named above (or by publication in certain circumstances) on or before the day of mailing or delivery to the Chief.

SURFACE OWNER WAIVER

Operator's Well
Number

Nolan 2

INSTRUCTIONS TO SURFACE OWNERS NAMED ON PAGE WW4-A

The well operator named on page WW-4A is applying for a permit from the State to plug and abandon a well. (Note: If the surface tract is owned by more than three persons, then these materials were served on you because your name appeared on the Sheriff's tax ticket on the land or because you actually occupy the surface tract. In either case, you may be the only owner who will actually receive these materials.) See Chapter 22 of the West Virginia Code. Well work permits are valid for 24 months. If you do not own any interest in the surface tract, please forward these materials to the true owner immediately if you know who it is. Also, please notify the well operator and the Office of Oil and Gas.

**NOTE: YOU ARE NOT REQUIRED TO FILE ANY COMMENT.
WHERE TO FILE COMMENTS AND OBTAIN ADDITIONAL INFORMATION:**

Chief, Office of Oil and Gas
Department of Environmental Protection
601 57th St. SE
Charleston, WV 25304
(304) 926-0450

Time Limits and methods for filing comments. The law requires these materials to be served on or before the date the operator files his Application. You have **FIVE (5) DAYS** after the filing date to file your comments. Comments must be filed in person or received in the mail by the Chief's office by the time stated above. You may call the Chief's office to be sure of the date. Check with your postmaster to ensure adequate delivery time or to arrange special expedited handling. If you have been contacted by the well operator and you have signed a "voluntary statement of no objection" to the planned work described in these materials, then the permit may be issued at any time.

Comments must be in writing. Your comments must include your name, address and telephone number, the well operator's name and well number and the approximate location of the proposed well site including district and county from the application. You may add other documents, such as sketches, maps or photographs to support your comments.

The Chief has the power to deny or condition a well work permit based on comments on the following grounds:

- 1) The proposed well work will constitute a hazard to the safety of persons.
- 2) The soil erosion and sediment control plan is not adequate or effective;
- 3) Damage would occur to publicly owned lands or resources;
- 4) The proposed well work fails to protect fresh water sources or supplies;
- 5) The applicant has committed a substantial violation of a previous permit or a substantial violation of one or more of the rules promulgated under Chapter 22, and has failed to abate or seek review of the violation..."

If you want a copy of the permit as it is issued or a copy of the order denying the permit, you should request a copy from the Chief.

VOLUNTARY STATEMENT OF NO OBJECTION

I hereby state that I have read the instructions to surface owners and that I have received copies of a Notice and Application For A Permit To Plug And Abandon on Forms WW-4A and WW-4B, and a survey plat.

I further state that I have no objection to the planned work described in these materials, and I have no objection to a permit being issued on those materials.

95007004

Nolan 2
Tyler County, WV
API #47-095-00700

Objective: Plug and Abandon Wellbore.

Pipe Schedule:

1. 10-3/4" set @ 330'. Cemented to surface
2. 7" J-55, 17# set @ 2,056' with estimated TOC @ 1,900'
3. 4-1/2" set @ 5,284' with estimated TOC @ 2,260'.

OIL 2083,
GAS 2150,
GAS 3610'
GAS 4754'
GAS 5125'

ELEV. 1160'

Procedure:

1. Coordinate and schedule casing jacks.
2. Notify WVDEP prior to commencing work, for plug witnessing (Mike Goff -304-549-9823)
3. Move in and rig up flat tank and frac tank (No pits will be utilized).
4. Move in rig up service unit.
5. Nipple up BOPE and test.
6. Kill well.
7. Rig up wireline and lubricator.
8. Make gauge ring run to CIBP Setting depth = 5,097' (20' above uppermost perf per CBL). Pull out of hole.
9. Run gyro survey
10. Lubricate in a cast iron bridge plug and set at 5,097'. Pull out with wireline.
11. Pressure test CIBP to 500 psi.
12. Pick up tubing, run in hole.
13. Tag and verify bridge plug setting depth.
14. Pull one foot above bridge plug.
15. Pump 100' plug from CIBP to 100' above CIBP. Cement = 10 sacks Class A with 2% CaCl₂; yield = 1.18 ft³/sk; water = 5.2 gals/sk; (Volume includes 20% excess).
16. Slowly pull out of cement plug. Pull tubing 200' and reverse circulate tubing clean.
17. Wait on cement 8hrs.
18. Load hole w/ GEL (approximately 456 ft³/82 bbls).
19. Run in tubing and verify top of cement plug at 4,997'.
20. If top of cement is deeper than 4,997'.
 - a. Mix and spot cement so top is a minimum depth of 4,997'.
 - b. Cement quantity to be determined but will be Class A with 2% CaCl₂; yield = 1.18 ft³/sk; water = 5.2 gals/sk; 20% excess.
 - c. Pull 200' of tubing and reverse circulate tubing clean (maintain hole full of GEL)
 - d. Wait on cement 8 hours.
 - e. Repeat steps until TOC is shallower than 4,997'.
 - f. Tag TOC after each/every plug set.
21. Trip in with wireline and run free point above top of cement (TOC = 2,260').
22. Trip out. Trip in and fire backoff charge at xxxx' (depth as determined via freepoint).
23. Back off casing at approximately xxxx' (depth a function of freepoint).
24. Pull out with wire line.
25. Rig up casing jacks and pull casing – lay down casing.
26. Run CBL from base of 7" casing to surface
27. Locate top of cement in 7" casing.
28. Pick up tubing and run in to 2,106'.
29. Pump a 100' balanced cement plug 50' below 7" casing at 2,106' from 2,006' to 2,106'. (50' above and 50' below 7" casing shoe). Cement = 35 sacks Class A with 2% CaCl₂; yield = 1.18 ft³/sk; water = 5.2 gals/sk; (Volume includes 20% excess).
30. Slowly pull out of plug. Pull 200' of tubing reverse circulate tubing clean (maintain hole full of GEL)
31. Wait on cement 8 hours.
32. Trip in and tag top of cement.
33. If cement is shallower than 2,006', then skip to step 35.
34. If top of cement is deeper than 2,006':
 - a. Mix and spot cement so top is a minimum depth of 2,006'.
 - b. Cement quantity to be determined but will be Class A with 2% CaCl₂; yield = 1.18 ft³/sk; water = 5.2 gals/sk; 20% excess.
 - c. Pull 200' of tubing and reverse circulate tubing clean (maintain hole full of mud).
 - d. Wait on cement 8 hours.

GEL MUST BE FRESH WATER WITH A MINIMUM OF 6% BENTONITE (BY WEIGHT).

- e. Repeat steps until TOC is shallower than 2,006'.
 - f. Tag TOC after each/every plug set.
35. When TOC is shallower than 2,006', pull 200' of tubing and reverse circulate tubing clean (maintain hole full of gel).
36. Trip out of hole.
- a. Trip in and fire backoff charge at a depth determined via freepoint.
 - b. Back off casing at approximately xxxx' (approximate depth of freepoint).
 - c. Pull out with wireline.
 - d. Rig up casing jacks and pull 7" casing – lay down casing. Maintain hole full of gel.
 - e. Trip in to depth of casing cut (~ 1,800').
 - f. Pump 100' cement plug from 1,850' to 1,750' (50' below and 50' above casing cut).
 Cement = 42 sacks Class A with 2% CaCl₂; yield = 1.18 ft³/sk; water = 5.2 gals/sk;
 (Volume includes 20% excess).
 - g. Pull 200' of tubing and reverse circulate tubing clean (maintain hole full of gel).
 - h. Wait on cement 8 hours.
 - i. Trip in and tag cement top.
 - j. If top of cement is deeper than 1,750'
 - a. Mix and spot cement so top is a minimum depth of 1,750'.
 - b. Cement quantity to be determined but will be Class A with 2% CaCl₂; yield = 1.18 ft³/sk; water = 5.2 gals/sk; 20% excess.
 - c. Pull 200' of tubing and reverse circulate tubing clean (maintain hole full of gel).
 - d. Wait on Cement 8 hours.
 - e. Repeat steps until TOC is shallower than 1,750'.
 - f. Tag TOC after each/every plug set.
37. Pick up to 1,160'(elevation) and set 100' cement plug from 1,160' to 1,060'.
- a. Pull 200' of tubing and reverse circulate tubing clean (maintain hole full of gel).
 - b. Wait on cement 8 hours.
 - c. Trip in and tag cement top.
38. If top of cement is deeper than 1,060'.
- a. Mix and spot cement so top is a minimum depth of 1,060'.
 - b. Cement quantity to be determined but will be Class A with 2% CaCl₂; yield = 1.18 ft³/sk; water = 5.2 gals/sk; 20% excess.
 - c. Reverse circulate tubing clean (maintain hole full of gel).
 - d. Wait on cement 8 hours.
 - e. Repeat steps until TOC is shallower than 1,060'.
 - f. Tap TOC after each/every plug set.
39. Pick up to 380'. Maintain hole full of gel. Set class A cement plug from 380' to 18' below ground.
40. During construction of new pad, cut off casing at 18' below ground level.

FOLLOW ATTACHED OFFSET MARKER GUIDANCE

OFFSET MARKER GUIDANCE

The Office of Oil and Gas is considering granting a general variance to the requirements under 35CSR4-5.5b of erecting a monument upon the plugging of certain wells. If granted, the following conditions will be met:

- 1) the well will be surveyed and a plat constructed as required under 22-6 of the WV Code and 35CSR4,
- 2) a readily visible, permanent offset marker, in as close proximity as reasonably possible, will be erected and will provide distance and bearing information to the plugged well,
- 3) the plugging affidavit (form WR-38), will document the absence of a monument at the well location and document the existence and location of the offset marker,
- 4) a steel plate no smaller than one square foot shall be affixed to the well casing no deeper than three feet below the ground surface and be inscribed with the api number of the well.

To qualify under the general variance, an operator may make a variance request to the Chief of the Office of Oil and Gas for a specific well(s) in conjunction with a showing of good cause by the surface owner.

CONSTRUCTION AND RECLAMATION PLAN AND SITE REGISTRATION APPLICATION FORM
GENERAL PERMIT FOR OIL AND GAS PIT WASTE DISCHARGE

Operator Name Sancho Oil & Gas Corporation OP Code 307863
Watershed Conaway Run Quadrangle Middlebourne
Elevation 1159' County Tyler District Centerville

Description of anticipated Pit Waste: No pit will be used at this site (All fluids will be stored in tanks and either reused or hauled off site.)

Will a synthetic liner be used in the pit? N/A

Proposed Disposal Method For Treated Pit Wastes:

- Land Application
- Underground Injection (UIC Permit Number _____)
- Reuse (at API Number Future permitted well locations when applicable. API# will be provided on Form WR-34)
- Off Site Disposal (Meadowfill Landfill Permit #SWF-1032-98)
- Other (Explain _____)

MAG
5-28-15

Proposed Work For Which Pit Will Be Used:

- Drilling
- Workover
- Other (Explain _____)
- Swabbing
- Plugging

I certify that I understand and agree to the terms and conditions of the GENERAL WATER POLLUTION PERMIT issued on August 1, 2005, by the Office of Oil and Gas of the West Virginia Department of Environmental Protection. I understand that the provisions of the permit are enforceable by law. Violations of any term or condition of the general permit and/or other applicable law or regulation can lead to enforcement action.

I certify under penalty of law that I have personally examined and am familiar with the information submitted on this application form and all attachments thereto and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine or imprisonment.
