

Ellsworth District, Tyler County, W. Va.
 Tyler Oil Co.
 Elevation, 800'.
 1 mi. up Lamblick Run on right side.
 Shown on 6-G, New Martinsville Quadrangle.

95-693A

	Top.	Bottom.
Keener Sand (gas and oil)(1728')	1728	
Total depth		1755

"It would appear that this sand is the same as that horizon producing in the Geo. Jacobs No. 1 (Fisher Oil Co.) up Lamblick Run, approximately 1/2 mile; sand horizon rises 20 feet to the Fenton Rice No. 10, as it should in this direction. Both produce gas at the top of the sand and oil about 10 feet below the top. Very little water is present. In the Jacobs, the quantity is 1 to 2 bbls. per week, salt. The oil production in both is light, 2 to 5 bbls. per week."
