

70045

Ellsworth District, Tyler County, W. Va.
 Southern Oil Co.
 Elevation, 730'.
 6-5/8" casing, 1440'.
 3/4 mi. up Tenmile Run.
 Shown on 5-H, New Martinsville Quadrangle.

4th location
 Found

	Top.	Bottom.
Maxton Sand (show oil or gas, 1492-8')		
Keener Sand (pay, 1627-1638')	(1625)	
Total depth		1657

Compiled from Fox No. 2.
 Injun (top, 1675)
 Should be a pay at 1728' (in sand).

("Maxton not a producer of commercial quantity. Keener pay approximately 10' thick near the top of the sand. In a few cases a second pay near the bottom. Injun usually carries water, with the oil pay approximately 50 feet below the top of the sand. The top of the Injun is separated by approximately 50 feet from the top of the Keener Sand. Big Lime appears to be only 10' thick in this area, with a 10' break of shale between it and the Keener Sand (apparently Keener Sand)."
