The image depicts a geological map with various annotations and features related to a well drilling project. The map includes information about the well's location, proposed well sites, and geological data. The map is marked with different symbols and labels, indicating various geological and hydrological features. The map is annotated with details such as the well's name, the company involved, and the location coordinates. The document also includes legal and regulatory information related to well drilling and environmental protection. The text is written in English, and the map is a technical drawing used for planning and regulatory compliance in the oil and gas industry.
