PERMIT MODIFICATION APPROVAL
Horizontal 6A / New Drill

VICKERY ENERGY, LLC
550 BAILEY AVE. SUITE 500

FORT WORTH, TX 76107

Re: Permit Modification Approval for JACK ANTHONY 2H
47-017-07023-00-00

Lateral Extension

VICKERY ENERGY, LLC

The Office of Oil and Gas has reviewed the attached permit modification for the above referenced permit. The attached modification has been approved and well work may begin. Please be reminded that the oil and gas inspector is to be notified twenty-four (24) hours before permitted well work is commenced.

If there are any questions, please feel free to contact me at (304) 926- 0450.

H. Jason Harmon
Chief

Operator's Well Number: JACK ANTHONY 2H
Farm Name: DAVID ROY FERREBEE
U.S. WELL NUMBER: 47-017-07023-00-00

Well Pad Name: Main Pad

19) Describe proposed well work, including the drilling and plugging back of any pilot hole:

The well will be spud using a conductor rig, drilled down to 100' per the casing program. 20" casing with be set with cement circulated back to surface. The conductor rig will move off location and a rig capable of drilling to TD will be moved in to continue drilling the well. That rig will continue drilling the well on fluid to the 13-3/8" casing point. Casing will be set with cement circulated to surface. Drilling will continue to the 9-5/8" casing point. Casing will be set with cement circulated to surface. Note: should we encounter a void during drilling, a cement basket will be placed above and below the void / cement balance to bottom of void and grout from basket to surface / or run external casing packer/ cementing stage tool above void internal and perform 2 stage cementing operation dependent on depth of void. (*If fresh water is encountered deeper than anticipated, it must be protected, with casing set 50' below and cemented to surface). We will continue drilling the well to TD and run / set / cement production casing per the casing program.

20) Describe fracturing/stimulating methods in detail, including anticipated max pressure and max rate:

Multi-stage slickwater fracturing with frac sand. Wireline conveyed pump down frac plug and perforating to isolate frac stages. Maximum pressure will be 10,000 psig and maximum rate will be 95 bpm.

21) Total Area to be disturbed, including roads, stockpile area, pits, etc., (acres): 43.38

22) Area to be disturbed for well pad only, less access road (acres): 10.26 well pad / 9.88 production pad

23) Describe centralizer placement for each casing string:

Conductor: N/A
Surface: Centralizer every 3 joints or 120'
Intermediate: Centralizer every 3 joints or 120'
Production: Run 1 sprial centralizer every 120' from TD to the top of curve
Run 1 spiral centralizer every 200' from the top of the curve to surface

24) Describe all cement additives associated with each cement type:

Conductor: Class A or L cement (see attachment for complete description)
Surface: Class A or L cement (see attachment for complete description)
Intermediate: Class A or L cement (see attachment for complete description)
Production: 50-50 Poz/Class A or L lead, Class A or L cement tail (see attachment for complete description)

25) Proposed borehole conditioning procedures:

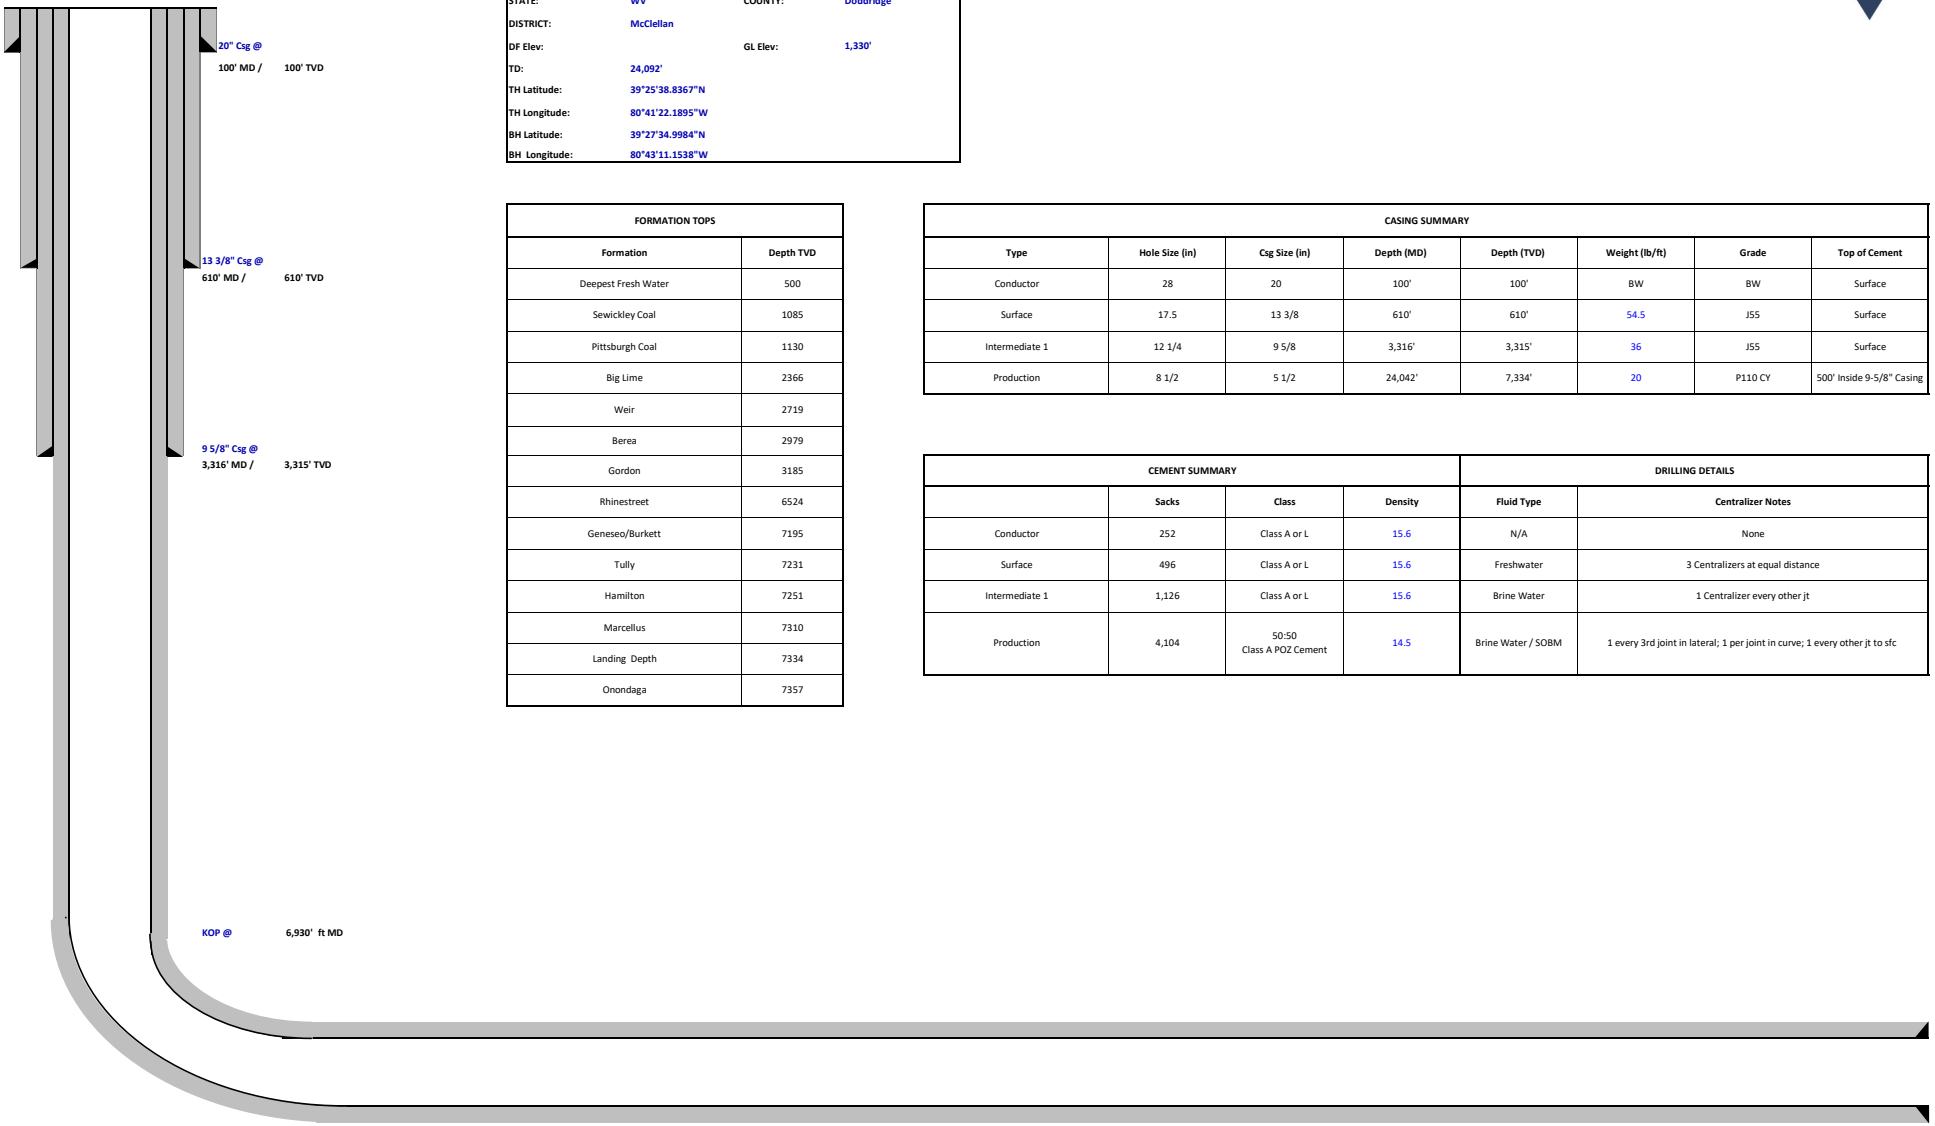

The well bore will be properly circulated at TD of each section until as much residual drill cuttings as possible have been removed from the well bore, residual gas has been circulated out, and the mud and well bore are both in good, stable condition. Mud properties will be adjusted, as needed, to ensure a clean hole. Hole cleaning times will vary by hole section and from well to well.

*Note: Attach additional sheets as needed.

WV Department of
Environmental Protection

Dear Taylor,

On behalf of Vickory Energy, LLC, Ascent Consulting and Engineering is pleased to submit the enclosed Horizontal Permit Modification Applications for the above-mentioned wells. The proposed wells are located in Doddridge County, West Virginia. Enclosed are the following:

CK#010204
CK $ 45,000.00

- Check **#010204** in the amount of $45,000.00
  - Modification application fee of $2,500.00 per well ($15,000.00)
  - Expedited application fee of $5,000.00 per well ($30,000.00)
- WW-A1 forms
- WW-6B forms – including inspector signature
- Revised Mylar Plats
- AOR MAPs & tables
- Modified Water Management Plan – including inspector signature

Additionally, Vickery Energy kindly requests a variance for the use of Class L Cement for the referenced project as well as an expedited permit review.

The enclosed information is provided in support of this request for DEP review and approval.

If you have any questions or require any additional information, feel free to reach out to me directly at 304.844.8890 or awright@ascentwv.com. Thank you for your consideration.

Sincerely,

Amanda Wright-Jones

Amanda Wright-Jones
